

## **Home page**

Humble House is a space that welcomes and houses the community of creatives, providing room and connections for these creative endeavors to grow. Set as a multifunction space by architectural creatives, Humble House is home to F&B creatives, fashion and art creatives, and—we sincerely hope—*your* creative undertakings.

## **The Building**

We understand that the building that houses a community as unique as Humble House needs to be equally as unique. That Timmy Anggara and US&P Architects are the only ones we can trust with its design. Located in Wijaya, a place near and dear to the Jakarta food and social scene, the design and architecture of Humble House is modern, open, and light. A new and creative space in the middle of the comfort and familiarity of tradition.

The first floor houses a number of unique and tasty offerings, while the second floor houses private working spaces, meeting rooms, and event space. Art installation and a garden terrace provide room for rejuvenation and wonder in the midst of business.

More on the design and inspiration of the building coming soon.

Connect with the creatives behind the building!

## **The Art**

As a space that houses creatives, Humble House prides itself in being home to works of art from one of Indonesia's great artists. Our art installation on the second floor of the House features works of art aimed to entice and encourage your creative energy. Petek Sutrisno is an Indonesian artist from Yogyakarta, with the unique skill of bringing the fantastical into every day normal life. And like Jakarta, his art brings the modern to a well-loved tradition.

More on the art installation at Humble House coming soon.

Connect with the artist!

## **Working Space**

Humble House aims to welcome and encourage creativity, especially in light of the bright idea generators we're surrounded with every day. We know that, often,

ideas fizzle out without proper support, we are passionate about providing the infrastructure and space for these ideas to grow. This working space also provides these groups with an opportunity to network and connect in a comfortable environment. The open layout of the second floor gives way to these connections and opportunities. At Humble House, we invest in the creativity through building and operational support.

If you are interested in one of our working spaces for your project, please contact us for more information.

### **Event Space**

Hosting an event is all about making people feel welcomed and wanted so they can fully enjoy and participate. We'd like to offer you a place at our House for your events and functions. Not all of your connections need to be held in big and impersonal spaces. Boasting at 98 sqm of space with the option of opening up to a terrace balcony, the event space at Humble House offers an intimate and warm space for your event. With our location being close to plenty of food and beverages options, you have access to a wide variety of refreshment options for your event.

Host your next event with us! Please contact us for more information.

### **Meeting Room**

In today's age of mobile and remote offices, Jakarta poses a need for meeting spaces around the city. While it's good and acceptable to conduct meetings in restaurants and cafes, often they lack the professionalism and confidentiality offered in private offices. We at Humble House decides to provide you with a space for your meetings, keeping them confidential, professional, and affordable.

Our meeting room at Humble House is a 30 sqm space that can be separated into two smaller meeting spaces; the full space capable of having around 12 people comfortable for your meeting. We will also provide the facilities and amenities to make your meetings at Humble House successful.

If you are interested in conducting one of your meetings at Humble House, please contact us to book your meeting room today!
